

A great tutor should not depend on

language, bandwidth, or ability.

Yet millions of learners are still excluded by English-first tools, unstable internet, and inaccessible formats.

**VoicePandita brings the tutor to the learner—
in the way they can learn best.**

THE GAP

1

Language

Bangla and indigenous learners

2

Connectivity

Low-data and offline contexts

3

Accessibility

Deaf learners and varied needs

Ask by voice. Learn with context.

A Bangladesh-first AI learning companion

LIVE PROTOTYPE

Next.js PWA • Supabase/pgvector • AI provider fallbacks • privacy-aware design

* BdSL text-to-sign playback is a prototype; low-resource language output uses verified-first safeguards.

From prototype to inclusive learning infrastructure.

RESEARCH

Validate learning gains, low-resource language safety, and accessible AI tutoring.

PILOTS

Co-design with schools and communities in low-connectivity settings.

SCALE

Build a sustainable Bangladesh launch and adapt the platform for global underserved markets.

Every learner deserves a tutor that speaks their language—and understands their reality.

OUR ASK

Help us prove,
pilot, and
scale.

Research partners
School pilot access
Incubation & mentorship
Market-entry guidance
